

Massaranduba

Durability class Class 1-2.

Specific gravity Fresh 1050-1350 kg/m3. At 12% moisture content 900-1100 kg/m3.

Colour Massaranduba hardwood is known for its dark red colour.

Massaranduba is used in bridge decks, various construction and garden projects. Furthermore, this **Applications**

tropical type of wood is suitable for tuning and wind instruments. Massaranduba planks are often

used for parquet floors.

Strength class D60.

Brandklasse gevel D, en B mogelijk met o.a. Forestlines®

Hardness 14200 N Janka.

Grain Straight, sometimes slightly wavy or slightly cross-threaded.

Timber texture This tropical hardwood has a fine grain.

Stability Average.

Massaranduba wood dries very slowly, with a strong tendency to deformation and surface cracks or **Drying**

end cracks.

Despite its high density, it is fairly easy to work with. Massaranduba has a nice smooth finish. The Workability

fine dust can cause inflammation of the eyes and mucous membranes.

Freshly sawn, Massaranduba wood is flesh-coloured, darkening to greyish reddish brown, dark

reddish brown or sometimes purplish brown. The heartwood is clearly distinguishable from the 30-50 mm wide white to light brown sapwood. Massaranduba hardwood has a favourable strength and has

little deflection at shorter lengths.

Screwing/nailing Pre-drilling is necessary with this type of hardwood.

Finishing of surface Good.

Details
